### Profile

---

I am a highly experienced and detail-oriented software engineer with over 3 years of expertise in designing, developing, and maintaining robust applications in the financial technology sector. I have proven expertise in system architecture, software development lifecycle (SDLC), and agile methodologies. I excel at collaborating with cross-functional teams to analyse user needs and software requirements for scalable solutions. My proficiency in Java, Python, and JavaScript, combined with a passion for learning new technologies, enables me to deliver high-quality code and facilitate continuous improvement. I am prepared to contribute to.....
